EMPLOYMENT

Programming Instructor

May 2023 – Present

jCoders Academy, Gjilan

Currently I am working as a part-time programming trainer at the jCoders Academy. I contribute to the improvement and development of curricula, providing instruction to various age groups in several areas of programming such as HTML, CSS, Python, robotics, as well as mathematics. In addition, I work on the design of program plans for youngsters on appropriate platforms for their ages.

Instructor

Sep 2023 – May 2024

jCoders Academy in partnership with RIT Kosovo, Gjilan

In my last job, I taught programming and math to students. I created and gave lessons that helped students understand both the basics and more advanced topics. I also designed course materials, led coding practice sessions, and gave one-on-one help to students when they needed it. This role helped me improve my teaching skills and inspired students to do well in technology and math.
